Beaconsfield Old Town

Katy Eachus found it hard to resist temptation in beautiful Beaconsfield, but agreed to share with readers the inside story on what she found

The low-down

Well known for its antique shops, historic Beaconsfield is bustling, with several new shops selling interior design products, jewellery and gifts opening up next to long-established ones. While the new town is only a mile away, Beaconsfield Old Town is full of carefully preserved charm and character, with small, specialist shops in historic buildings and plenty of free parking. There is a busy market on Tuesdays, and lots of tempting places to eat when you've finished shopping.
